Orange Toolbar Icons, a set of 46 full color icons in one set with OSL and IPT. Full color, as most OSL vector graphics. Resizable and Scalable. Retina ready. Available in BMP, PNG, PSD and vector format. Download Size: 135 MB Platform: Mac OS X 10.6 or later Download Direct Link: \$16.00 KEYMACRO Description: Orange Toolbar Icons, a set of 46 full color icons in one set with OSL and IPT. Full color, as most OSL vector graphics. Resizable and Scalable. Retina ready. Available in BMP, PNG, PSD and vector format. Download Size: 135 MB Platform: Mac OS X 10.6 or later Download Direct Link: \$16.00 KeyMacro At Active Theme we believe in quality designs for excellent prices. We have taken great care and attention to detail in creating this stunning set of OSL and IPT icons for your next icon set. The set contains 46 full-color icons in three sizes: 16x16, 24x24, and 32x32. All images are transparent and compatible with OSX 10.6 or later and Windows Vista, 7 or later. What is OSL (Open Source Layer)? OSL is a file format that can be used to create layered images, animations, and icon themes. It was created by a team of professional designers, to provide a simple way of creating, editing, and exporting these complex files. The files are created using vector drawing software, allowing for easy editing and scalable without loss of quality. OSL is based on XML, so developers and designers can create multiple variations of an icon in the same file. This means it's easy to adapt the same icon file to a variety of different applications and web sites. Why use OSL when other formats are available? 70238732e0
